8 Target market reach:

What is the proposed market reach or distribution of the company's products or services?

- Local
- National
- International

9 Anticipated earnings before Interest & Tax (EBIT):\$ Per annum.

Just numbers, no "," or "\$". Assuming you have already raised the funds you need and have implemented them in accord with your business plan. Give us the average annual EBIT (Earnings Before Interest and Tax) for the next projected 3 years. Calculate it this way please Year 1 EBIT + Year 2 EBIT + Year 3 EBIT = \$TOTAL. Then divide that number by three to give us a conservative estimate of the potential future average annual EBIT.

10 Stage of Growth:

Please select one option below that best describes the stage of development/growth that your enterprise is at right now.

- Idea/Research
- Proof of Principal
- Working Prototype
- First Sale
- Sales no Profit
- First Profit
- Growth Expansion Phase

11 What is your Preferred Share Pricing Structure?:

Depending on the amount being raised, would you prefer to have incremental price increases during the capital raise? As your raise progresses and you to reach each milestone objective, this can present an opportunity to increase the share price in subsequent rounds, for the balance you are seeking. This can encourage investors to get in early and can help build momentum in the raise.

- I would like to split our raise into 2 or 3 rounds with incremental share price increases.
- I want all the shares to be issued at the same price.
